About This Content

This War of Mine: The Little Ones DLC
10% from each purchase goes to War Child, a charity helping children in conflict-affected areas
www.warchild.org.uk

This War of Mine: The Little Ones explores the hardships of wartime survival as seen from an entirely new perspective—that of a child. This DLC puts you in charge of a group of adults and children stuck in a besieged city, struggling with basic necessities. TWoM: The Little Ones focuses not only on the reality of enduring war, but also on how even in times of conflict, kids are still kids: they laugh, cry, play, and see the world differently. In addition to thinking about survival, you'll have to summon your inner child to understand how to protect the little ones. Their youth, and their future, are in your hands.

A word from the developers: "From our perspective, adding children to the experience was the most important move to complete the big picture. But it required utmost respect for victims of war, so understandably, we wanted to present the topic without any gratuitous gore. In fact, our goal was to show how little ones perceive the reality of an armed conflict. And again, if you decide to purchase the DLC, you're contributing one dollar to War Child. Thank you!"

This War of Mine: The Little Ones:

- Experience the biggest expansion to This War of Mine

-
- Protect innocent children
 - Craft toys, play with kids, and be the caretaker they need
 - Meet new adult civilians in scenarios with children
 - Support the War Child charity simply by purchasing the DLC

Title: This War of Mine - The Little Ones DLC

Awesome game. It's loosely based on an old D&D-like roleplaying game set in the Fighting Fantasy universe. I can't tell you how similar it is to the original game, though, because I don't have any experience with that. I'm sure the gameplay mechanics are a good bit different. It's super fun & interesting, though. It's not challenging so far, but I still haven't gotten around to beating part 2, & there's a part 3 out now, so I can't tell you whether or not it gets significantly more difficult. It's incredibly imaginative & well-written, though. I love the magic system. Lots of spells that are useful outside of combat, & some that have both violent & non-violent uses. The gameplay system is super simple, so it might even be a good way to get new people into fantasy gaming, but I also had a lot of fun with it, & I've been around the block a bit when it comes to both video games & pen-&-paper games like D&D (which, you'll recall, is similar to the pen-&-paper game Fighting Fantasy that this is based on). I admit I would probably get even more into it if the system was a bit more complex & included some more typical number-heavy RPG elements, but it's still really, really good the way it is. I highly recommend it.. I own yet VRtural Sports, from Vive Studios, than is just excellent (best VR tennis available for any system by a big margin). I ever watched at Arcade Saga because of his many features, and especially progression and powerups. Something didn't convince me 100% for the full price, but during Summer Sales with a big discount I can't say no.

Well, it surely worth 5\$ but hardly I can suggest this one at 20\$.

There are three (simple) games with ton of levels and a good polishing, but all of them are so so to play. It looks a sort of medley between Holoball, Holopoint, Racket NX and Cyberpong. From the quantity side is a winner, but still get old fast.

Let's hope than the next Vive Studios game (even Virtual Sports has two disciplines) won't be a collection of something, but just a single and full featured game good enough to be sold alone.. Deserves more Attention. Fun game and tiring...I played for a while and only stopped because of exhaustion
. Unplayable... Simply unplayable...

This game looks good and I like the premise but the control scheme makes this game simply unplayable. I have been playing flight games for years, and I have never seen a game with a control scheme that makes so little sense. If you want to make the default something so bizzar that's fine, but you have to give serious users the option to create custom control mapping. This game is not worth retraining my brain to a new control scheme that is completely differnt than anything else out there. The art looks good and I the controls are responsive but unusable to me. I would not recoment this game to anyone until the controls are revised or users are allowed to create custom mapping.. In early access, but seems pretty cool so far, it reminds you a bit of super smash brothers but with its own flair.

Fun style animations and combat. I would love to play it finished.. This seems like the perfect type of game to give to one of your children to keep them busy for a few minutes

It's not too challenging and you can get better at it or you could give it to your elderly relative to help with their memory

Overall I think this is not a bad game considering that it's just one of those point-and-click hidden object games and it's not too annoying and entertained me for a few minutes.

Here's some example gameplay

<https://youtu.be/G3aZOo2mxZY>

. WHAT? I HAVE TO RENEW IT AFTER A SHORT TIME? what the heack. ITS a good software but really? NOT RECOMENDED. At best this relic should be sold at the \$2-3 price point. The animations, skills and flow of combat are all rather poor. No reason to get this unless you've played Torchlight 1V2, Van Helsing, and other similar titles to death and need a arpg fix, but be forwarned that there is little substance in this title.. Almost anything will give you a better shooter experience than this.

This game was tons of fun! To start out I never played the original so I had no idea what to expect but it looked awesome so I grabbed it. I noticed a few frame drops while playing but nothing huge. We did hit a bug that wouldnt let us start our event but after making a new session things went fine. The gameplay is fast pace and very fun. Not to mention so many cars!!! I have to say I will for sure be playing this one again and for the low price id recommend this game! :)

Check out my video to see some gameplay:

<https://www.youtube.com/watch?v=EMw8SxVBEds>. One of the best modular ship design games i ever played. simple to learn, fun to play. The different modes offered are very varied and the number of parts to build from is increasing from patch to patch.

Please, take my advice and try this game! if you don't like it after an hour or so you can always refund it on steam instantly, but I doubt you'll remember to refund it because you'll be too busy battling the von numan death ships :DDD. This is the only game you will ever need, sell all of your assets immediately and buy multiple copies of this game for your friends and loved ones.. Very short but nice little game. I wont bother saying anything else as its free, i would recommend it, just try it!. umm i just bought this pack and i did not get the 3 million exp. It would be much better if there was a voice who speaks the Pinyin of the given Characters ! This game is very helpful for people who already know a little chinese and wanting to improve their chinese level of reading and recognizing characters!

. 1. For vive users, you need to lean a bit forward to use controller properly. I agree that the crossair position needs to be adjusted, but it is definetly playable in its current stage.

2. Game takes at least 2 hour to complete, and have a 15 mins exposition\vtutorial. So when you see reviews with 0.4 hour played, it means they gave up half way through chapter 1.

3. It is a rail shooter because managning shield and varies weapon systems will occupy both of your hands. If that 0.4 hour reviewer played a bit more and unlocked more weapons, he would understand how painful it would be to simutaniously holding up a shield, swithching weapon with the other hand, and also manage movement all at the same time.. They stole my granny!!! Fun and addictive game, shooting fireworks is awesome!. I really was not expecting lo like this one but actually I did it. It has plenty of replayability , if you like the game where you can make choices and modify the story, this is a good purchase.. The class66 a loco that we all love is in train simulator it is just like my hornby one but it has light's i will give it 11V10
